Docker

PROFESSIONAL EXPERIENCE

COGNIZANT-MOBILITY

March 2024 - present

Software Developer

- Working for 2 independent projects in the auto industry, managing my time in order to perform on both sides
- Maintain monolithic system, revolve bugs and prepare for a new release
- Update outdated versions of frameworks and libraries
- Improve my system troubleshooting skills

ENDAVA

February 2022 - March 2024

Software Developer

- Did maintenance for a monolithic system in order to one have one final release.
- I have been working on a microservice application from its inception. During this time, I actively implemented new features, resolved discovered bugs, and facilitated integration for the main application with multiple services.
- Handled confidential documents and maintained their proper organization
- Developed features across the microservice, ensuring scalability
- and seamless operation

PERSONAL PROJECT

2023

GitHub: <https://github.com/elenastoian/gardening>

- Developed a dedicated gardening forum, resulting in being responsible for creating the software architecture of the application, implementing the application requirements, testing the functionality and deploying it
- Integrated an OpenAI chat bot, exclusively focused on gardening topics

EDUCATION

WEST UNIVERSITY OF TIMISOARA

2019 - 2022

Bachelor's Degree in Psychology
