

ELENA STOIAN

SOFTWARE DEVELOPER

Phone: +34 644 627 933

E-mail: elenastoian00@gmail.com

Location: Barcelona, Spain

LinkedIn: <https://www.linkedin.com/in/elena-stoian-61845b195/>

GitHub: <https://github.com/elenastoian>

SKILLS

Backend: Java, Spring Boot, Hibernate/JPA, Maven, Mockito, JUnit5, Ant, Liquibase

Frontend: Angular, PrimeNG, PrimeFaces, TypeScript, HTML, CSS

Databases: SQL (PostgreSQL, Oracle), NoSQL (Documentum)

Monitoring tools: Graphana, Dynatrace

DevOps/Containerization: Docker, Jenkins, Atlassian Bamboo

Others: Git, Agile, GitHub

PROFESSIONAL EXPERIENCE

NTT DATA Europe & Latam

June 2025 - present

Software Developer | Java 21, Spring Boot, Angular, Maven, Graphana, Dynatrace

- Contributed to the development of a large-scale insurance application, implementing new features end-to-end (frontend to backend)
- Improved overall code coverage across unit and integration tests
- Refactored legacy code to enhance performance, reusability, and maintainability

COGNIZANT-MOBILITY

March 2024 - May 2025

Software Developer | Java 8, Spring, Oracle, Hybernate, Documentum, Ant, PrimeFaces, Atlassian Bamboo

- Established a new HTTP connection to a service using plain Java 8. The implementation involved importing a file, mapping its contents to the application's data model, and transferring it from one drive to another.
- I was responsible for integrating new features, testing, fixing bugs, deployment of a new version, updating outdated frameworks and libraries, managing documentation, and implementing new service communication.
- Working for two independent projects has strengthened my soft skills, such as time management, effectively task prioritization, and clear communication with team members.

ENDAVA

February 2022 - March 2024

Software Developer | Java 17, Spring Boot, PostgreSQL, JPA, Liquibase, Keycloak, Docker, Maven, Jenkins

- Implemented data migration from legacy systems and multiple services into a new database, ensuring accurate mapping to the new system.
- I improved the project's code quality by increasing unit test coverage from 40% to 80%.
- I have been working on a microservice application from its inception, where I actively implemented new features, resolved bugs, facilitated integration of the main application with multiple services, and tested my implementations.
- I learned how to work in Agile, and follow the best practices to deliver quality work.

PERSONAL PROJECTS

Parental Management Website

2024

Java 17, Spring Boot, Angular, PrimeNG, Maven, PostgreSQL

I created a full-stack web application to help parents manage their babies' routines and activities. It includes the following features:

- Secure user authentication and authorization using Spring Security with Bearer JWT token.
- CRUD operations for parent and baby profiles and related entities.
- Detailed tracking of baby activities such as feeding, screen-time usage, and sleeping patterns.
- Built using a layered architecture (controller, service, repository) to ensure clean separation of concerns

LANGUAGES

English - Professional Working Proficiency (C1)

German - Elementary Proficiency (A2)

Spanish - Elementary Proficiency (A2)

EDUCATION

WEST UNIVERSITY OF TIMISOARA

2019 - 2022

Bachelor's Degree in Psychology
